

Frostguard 20 Sleeping Bag - Care Guide (Washing / Storage)

Washing:

- Use a front-loading machine on gentle cycle with down-specific cleaner.
- Avoid top-loading machines with a center agitator, which can damage baffles.
- Tumble dry on low heat with clean tennis balls to restore loft; this takes several cycles.

Storage:

- Store loosely in the included large mesh storage sack, never in the compression stuff sack.
- Keep in a cool, dry place out of direct sunlight between trips.
